2017 SOIL FERTILITY AND NUTRIENT MANAGEMENT SHORT COURSE

John Sawyer, Professor, Department of Agronomy, Iowa State University

If you are interested in an in-depth course covering soil fertility and nutrient management, then consider attending the Iowa State University Extension and Outreach 2017 Soil Fertility and Nutrient Management Short Course. This is a two-day event that provides an opportunity to dig deeper into the fundamentals of soil fertility, nutrient management, and relationships to profitable crop production and water quality. The course is February 8-9, 2017 at the Scheman Continuing Education Building located at the Iowa State Center in Ames, Iowa.

Course Topics Include:
• Iowa soils and soil properties
• Soil sampling and testing
• Cation exchange
• Soil pH and liming
• Essential plant nutrients
• Secondary and micronutrients
• N management and products
• Soil N dynamics, crop uptake, and diagnostic tools
• P and K management
• Environmental P and the Iowa P-Index
• Site-specific management
• Manure management

Class size is limited to 40 individuals and pre-registration is required to attend. More information about the course and course registration is located at this web site.
