

WELCOME TO THE REVISED SOIL FERTILITY WEB SITE

John Sawyer, Professor, Department of Agronomy, Iowa State University

Antonio Mallarino, Department of Agronomy, Iowa State University

The Iowa State University Extension and Outreach Soil Fertility web site (<http://www.agronext.iastate.edu/soilfertility/>) has undergone a recent redesign. The layout should look familiar, with a slight change in where things are located. The Current Topic articles remain a major emphasis on the home page. The main focus of the site is information in twelve nutrient topic areas, with information encompassing Extension publications, newsletter articles, conference proceedings and reports, presentations, and links to other web sources related to the topic. There will also be a featured publication on each nutrient topic page. Links to soil fertility publications will take you to the [ISU Extension and Outreach Store](#), where you can download or purchase your selected publication. If you are interested in a past [Current Topic](#), you can find those under the link in the upper right header of each page. We hope you find the site useful.
