

ANNOUNCEMENT: NCERA-13 SOIL AND PLANT ANALYST'S WORKSHOP

Antonio Mallarino, Professor, Department of Agronomy, Iowa State University

The North Central Region Extension and Research Soil and Plant Analysis Committee (NCERA-13) organizes the North Central Region Soil and Plant Analyst's Workshop every two years. The workshop address current relevant issues concerning soil and plant analysis methods, soil and plant tissue tests interpretations, and soil-test based nutrient management. The program especially target managers, technicians, and agronomists of private and public testing laboratories, but the program also is useful to nutrient management planners, crop advisers, and crop consultants who work with laboratories, soil test interpretations, and provide soil-test based nutrient management guidelines. The 2019 workshop will be in Iowa City, Iowa.

For details and questions about the workshop, including the meeting location, registration, lodging, and program agenda visit the workshop website at <http://www.aep.iastate.edu/ncera/>.

Early lower-cost registration (\$70) is available until midnight Monday February 18, 2019.

CCA nutrient management credits will be available.
